PERSONAL PROJECTS

Netflix clone

- Created a front-end architecture by observing and highlighting the most important aspects of clones.

- Highlighted the thin and small details that could help to enhance the user's experience.

Ayushman Bharat UP clone

- Created a webpage resembling Ayushman Bharat clone using HTML for structure and CSS for styling, ensuring it replicates the visual design and layout of the original.

First fiddle Website

- Developed First Fiddle website utilizing Bootstrap framework, ensuring responsive design and intuitive user interface. Incorporated dynamic elements to enhance user engagement and provide seamless navigation.

TODO - List

- Developed a simple yet effective To-Do List application using JavaScript, allowing users to manage tasks efficiently.

Implemented features such as task creation, deletion, and marking tasks as completed for enhanced productivity

Countdown

- This is a simple countdown timer implemented in JavaScript. Users can easily customize the countdown target by modifying the countdown date variable in the script. This timer is suitable for various applications such as event countdowns, product launches, or any situation where counting down to a specific date and time is needed.

Tourist

- This tourist project stands as a testament to the power of PHP in creating dynamic and interactive web applications. The combination of server-side scripting and frontend technologies has resulted in a comprehensive platform that caters to the needs of both avid travelers and those seeking reliable information about various destinations.

Badminton Association Of India

- The Badminton Association of India web page using HTML and CSS, we have successfully created a visually appealing and functional platform dedicated to showcasing the rich world of Indian badminton.
